INDEXABLE MILLING CUTTERS

Ajinkya industries has developed one of the widest programmes that can be found at present in the market. The customer has the possibility to choose among different tools, for any kind of machining.

The general milling programme by Ajinkya industries is meant for all kind of machining and operations of face milling, square shoulder, slot and side milling, chamfering, etc.

Manufacturers of All Types of Indexable Tool Holders

INDEXABLE DRILLS & CORE DRILLS

Drills for indexable inserts from 15 to 60 with drilling depths of 3 and 4 times the diameter and with two only multi-functional grades for all kind of materials. The short drilling programme goes from 17,5 mm to 55 mm. These drills are appropriate both for lathes and for C.N.C. machining centres. The Maxdrill programme by Ajinkya offers a wide range of drills , with a drilling capacity from 15 mm up to 60 mm of diameter. Every drill body can be assembled with a range of difference diameters.

DESIGN

The capacity of our technical office allows us to design and develop thousands of designs of standard tools as well as specials.
